

The FARM TRIBUNE

Vol. XVII, No. 22

PUBLISHED WEEKLY — PORTERVILLE, CALIFORNIA

November 14, 1963

ONE HIGHLIGHT of the 45th Annual Veterans' Day and Homecoming in Porterville November 11 was the breaking of ground for Porterville's new National Guard Armory, with photo at top of page showing the speakers' platform on the armory site at Grevilla and Olive avenue. Participating in the actual ground breaking in above photo, from left: J. Claude Nelson, one of the armory committee members; Porterville Mayor Bill Rodgers, Congressman Harlan Hagen, Lt. Gen. Roderic L. Hill, adjutant general of the State of California; Lester J. Hamilton, former Porterville mayor who "started the ball rolling" nearly 10 years

ago on the armory project; State Senator Howard Way and State Assemblyman Myron Frew. Others participating in the ceremony included: Capt. John Garay, commanding officer of Co. B, 2nd battalion, 185th Armor - the unit stationed in Porterville; Col. Alvin E. Howell, of Upland; Maj. David L. Marlin, of Bakersfield; Maj. Alvern C. Condon, of Visalia; Maj. Harry Titus, of Bakersfield; Maj. Robert Cherry, of Fresno; Lt. Burnell Mercer, aid to Gen. Hill; Jack Campbell, of Fresno, contractor who will build the armory; Harold Compton, of Delano, senior vice commander, 9th district, Veterans of Foreign Wars; First

District Supervisor Charles J. Cummings; and, from the California Highway Patrol, Capt. Bob R. Smith and Sgt. Glenn Craig, of Visalia. Invocation was spoken by the Rev. Charles M. Brandon; Rodgers served as master of ceremonies; short talks were given by Gen. Hill, Congressman Hagen, Capt. Garay and Hamilton; aerial bombs were fired by Harlan Bentz; the Porterville High School band, directed by Buck Shaffer, played. Hosts were Porterville city council members - Anna Garland, Vice Mayor Aubrey M. Lumley Jr., Former Mayor Jack Letsinger, and Mac Williams.

SPRINGVILLE TO VOTE ON UTILITY BONDS

SPRINGVILLE, Nov. 14 — Residents of the Springville community will vote on December 10 to determine whether or not the Springville Public Utility District shall issue bonds in the amount of \$30,000 for improvement of the community water system, and in the amount of \$127,000, plus revenue bonds of \$53,000 to construct a community sewage disposal system.

A public meeting to answer questions relating to the bond proposals will be held December 2, 8 p.m., in the Springville Memorial building; all interested persons are invited to attend.

Present at the meeting will be directors of the district — Carlos Gregg, Ernie Rutherford and Kenneth Van Ness; also Jim Sorenson, of Visalia, district engineer, and Walter K. McCormick, of Visalia, attorney for the district.

Present also will be representatives of the Tulare County Health department, since improvement of sanitation in the community is one of the major reasons for the project.

Editorial Comment

LET THE BELLS RING (On Cash Register)

Patriotic respect, tradition, entertainment, reunions with old friends, a day of celebration.

All of these elements were present on Monday during this community's 45th annual November 11 celebration — Armistice Day years ago, Veterans' Day and Porterville Homecoming now.

This kind of celebration once a year is good for a community; it has been good for Porterville; its underlying thought — tribute to men and women who have given their lives for their country, is sound; it has been a day that traditionally was turned over to the Veterans of the community, and the Veterans have handled it well.

But when thousands of people line Main street, there are some retail business men whose hearts start to bleed and whose minds visualize the tramping of feet and the moving of human masses through doorways of their stores. Their desire for a few bucks of profit overshadows all the other aspects of the day, so their doors are opened — several of them this year.

We hold these men in a certain amount of contempt, but more, perhaps, in pity, for somewhere along the line they have lost an appreciation for certain patriotic values that are difficult to define but that are basic and necessary to our Republic.

We don't propose to tell anyone how to run their business, not as long as we have a United States of America, and by the same token, we will express our opinion as our opinion is.

When Veterans' Day in Porterville, and in America, becomes just another retail sales promotion, we might as well forget about patriotism, forget about patriotic tradition — forget about the United States of America.

But we can then create a new national shrine, with Old Glory flying proudly above it — A tremendous cash register bell to replace America's worn out Liberty Bell.

National Scene

By JAMES DORAIS

Is the continuing automation of American industry a boon or a disaster—a genuine cause for worry or a natural development in the centuries-old trend toward mechanization that has and will continue to improve living standards for the great majority?

Twelve years ago, when the electronics industry began to assume real importance on the American scene, it was widely predicted that automation was proceeding with such speed that factories would be fully automated in 10 or 20 years, and that, in the words of one expert, America was faced with "a decade or more of ruin and despair." Obviously, the prediction was somewhat exaggerated.

No Drop in Employment

Yale Brozen of the Graduate School of Business at the University of Chicago, writing in the magazine "Washington World," points out that there are still employed today more than 12 mil-

lion production workers in factories, about the same number as at the time the dire prediction was made. In that period, total employment in manufacturing industries has actually increased by more than a million men.

How rapidly automation comes about, Brozen contends, depends upon the availability of capital and the rapidity of the rise in wage rates. Total spending on business plant and equipment is less than \$40 billion a year, and almost half this amount is required to replace obsolescent and worn-out plants.

Two Centuries to Automate

This leaves a relatively modest amount available for conversion to automated equipment. Brozen estimates that it would cost more than \$2.5 trillion to completely automate all American manufacturing, and that at the current rate of modernization, this would take two centuries to come about.

In actuality, the recent pace of technological change is no greater than in the past, and probably is

slowing. Where automation has been achieved, its effect, according to Professor Brozen, has been to increase the relative number of maintenance men, engineers, office employees, production control specialists and other non-machine operators—a continuation of a trend which has been going on for a long time.

"The primary effect of automation," he states, "is not a reduction in the number of jobs available. Rather, it makes it possible for us to do many things which otherwise could not and would not be done."

Sacramento Senate Scene

By Howard Way

State Senator, Tulare County

The past three weeks have been busy ones for several of the Senate committees. The hearings dealing with the use of pesticides have attracted particular attention in this area. Our Senate Fact Finding Committee on Agriculture met to gather information and to hear opinions on AB 2233. This proposed legislation would, among other things, transfer from the Director of Agriculture to the Director of Public Health the responsibility for designating "injurious substances" and for assuming some control of them.

Although the name of Rachel Carson was used only a few times, the impact of her book "Silent Spring" was obvious, and the implied question seemed to be, "Are pesticides a blessing, or an abomination?" Testimony was heard from a wide group. There were biologists, canners, grocers, entomologists, retailers, foresters,

conservationists, dairy men, consumers, crop dusters, chemists and doctors.

Allen Grant, speaking for the Farm Bureau, Dr. Don Murray, speaking for Mosquito Abatement Districts, and Richard Butcher, the manager of Citrus Pest Control Districts were people from this area who appeared before us.

Although the Committee's work is not yet finished and the final report still in the future, I thought you would be interested in a few of the viewpoints which were presented. Testimony seemed to fall into two broad classes.

There were those who pointed to the phenomenal food and fiber production of American agriculture and believe that without the use of chemicals the quality and quantity of this production would suffer tremendously. They believe that man does, and should, alter his environment and the question

how he can survive in the face of the world's population explosion without using pesticides. They feel that agriculture is using chemicals wisely and with safety for the consumer. It is only the misuse of pesticides which leads to the occasional tragic headline. These people feel that the Director of Agriculture is doing a fine job in regulating the use of agricultural chemicals, and that the present misuse can be corrected by education rather than by new legislation.

The other group's opinion was that the man reason for controlling the use of pesticides is to protect the health of the people, and that this could best be accomplished by the Public Health director in an agency not primarily concerned with furnishing the production and marketing of agricultural products. They point out that although California has only five percent of the nation's land, we use 20 per cent of the nation's pesticides. They are not only concerned about residue on food, but about the widespread use of chemicals to kill weeds, spray trees, control insects in towns, forests, and waters of the state, and its use in the home. They wonder

(Continued On Page 11)

CALIFORNIA SPEAKS

WALTER SPATZ, Los Angeles — "The three R's deserve the keenest attention not only because of their own utility, but because they also lay a foundation of intellectual discipline."

RICHARD L. BENTON, Orangevale, on religion in schools — "This country was built by our forefathers with a trust in God, and a strong back and a clear eye; not to be destroyed by a few who would bury our heritage and kill the spirit that has created this country of ours."

N. H. BLACK, Arcadia — "Moral and spiritual leadership is the priceless ingredient in any candidate, although it bewilders sophisticates in any party."

F. R. FOPPIANO, San Mateo — "Some of the biggest teen-age problems today are caused by letting these youngsters own and operate vehicles. The minimum age for qualified drivers should

be 21." JILL JACOBSEN, Auburn — "Governor Brown has refused to repudiate the Young Democrats for their Commie-like resolutions. He says they have a right to their views. Yet he insists that Senator Goldwater repudiate the Birch Society. Don't they have a right to their views?"

Faculty Members Participate In Community Work

PORTERVILLE, Nov. 14 — Eighteen of the 25 full-time faculty members at Porterville College participated in some type of community service work during the two-week period which ended November 4th.

Statistics showed that six college instructors took part in college-high school department personnel meetings, and two others in meetings with elementary department personnel.

Three faculty members acted as consultants in conferences away from the campus, and six others attended conferences located in Taft, Long Beach, San Diego, Hayward, and Los Altos. All were related to college instructional problems.

Four other faculty members were active in miscellaneous activities, including participation in Lions and Kiwanis Clubs, Parent-Teacher Associations, and Boy Scout work.

EDWARD M. BUCKLES RESEARCH PROJECT

PORTERVILLE, Nov. 14 — Edward M. Buckles, chairman of the business department at Porterville College, is listed as one of the two principal researchers in a publication, "A Survey of Junior College Work Experience Education Programs" just published by the di-

Club Auction Brings \$1,750

PORTERVILLE, Nov. 14 — Annual Exchange club auction recently brought \$1,750 to the club with the money to be used for the annual free Fourth of July fireworks show in Jamison stadium. All auctioned items were donated by people of the community.

QUEEN OF the 1963 Junior Rodeo, sponsored by the Orange Belt Saddle club and held November 3 at the Rocky Hill arena, was Cinda Baker, 13-year-old daughter of Mr. and Mrs. Tom

Baker, of Porterville. Attend-ants were Susan Shelton, daughter of Dr. and Mrs. Jim Shelton, of Porterville, and Patsy Williams, daughter of Mr. and Mrs. Dan Williams.

By John

We hope you'll find time to garden this month if only to rake the leaves and enjoy the crisp autumn air. Especially as this crisp air will be followed by some downright chilly atmosphere that will drive all but the hardier souls indoors. It's not really that the weather becomes so terrible once you're out in it but it sure gets harder every year to believe it.

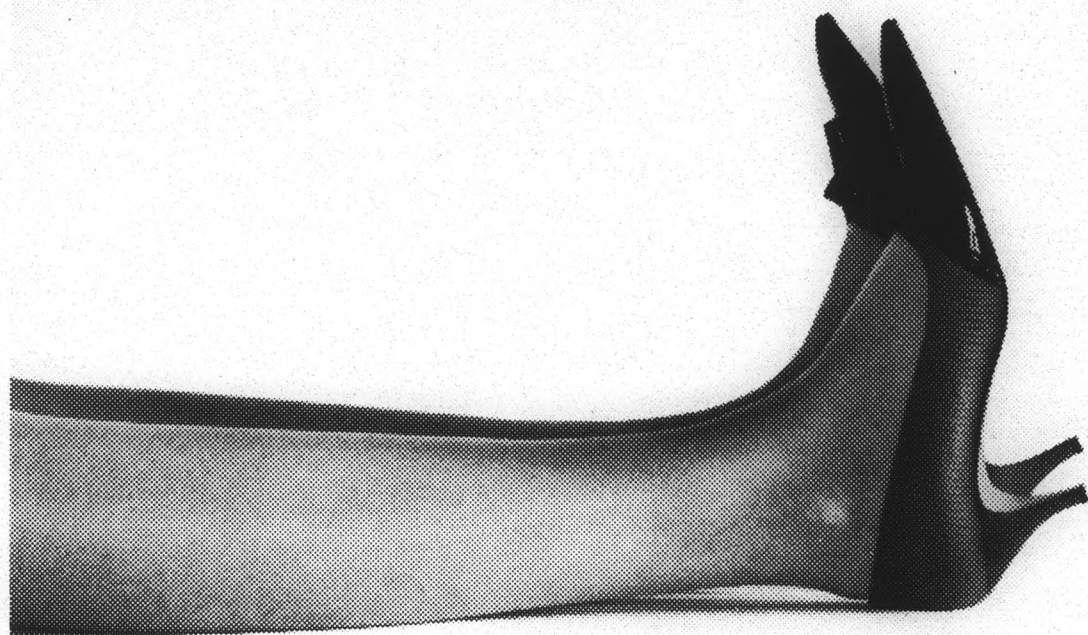

Along the line of saving work later, this is a good time to oil the young weeds before they get too tall. If you can't swipe the oil somewhere, we sell it by the gallon. We also loan small oil sprayers for twenty four hours without charge. These are good for spraying around shrubs, edging the lawn, or discouraging the neighbors bermuda. They must also be good for holding the garage door open judging by the length of time some customers keep them.

Bulbs are fast being sold out and we urge you to come in soon if you wish to plant any. Daffodils, Ranunculus, Anemone, and Sparaxis are all good hardy creatures that will brighten your spring. A real bargain is a five pound sack of assorted daffodils for a dollar fifty nine. Lesser bargains are also available so come by soon.

DAYBELL'S

You'll swoon, too, when you discover how much you save with a Gas clothes dryer. There's a small fortune to be saved on installation alone. (Other kinds of dryers can cost as much to install as they do to buy!) You save on operating costs, too. Less than 2¢ a load with a Gas dryer. (Other kinds cost four times as much!) Drying time? Nothing beats the speed of modern Gas. A Gas dryer keeps right up with your washer...dries clothes soft, fluffy, airy as can be. 'Nuff said? Visit your dealer's or Gas Company show-room now. Take a peek at the trouble-free, fast, money-saving Gas dryers. You'll swoon, too.

Udall's Water Plan Opposed By State Senate Group

SACRAMENTO, Nov. 14 — Unanimous opposition against the Udall Pacific Southwest Water Plan was expressed in a resolution transmitted to Governor Edmund G. Brown last week by the Senate Fact Finding Committee on Water Resources. Senator Howard Way (R. — Tulare Co.) is a member of this committee.

The resolution states not only that the plan is "unacceptable" but that "it cannot be revised or modified in such a way as to make it acceptable."

The resolution, pointing out that there is little chance for U.S. congressional authorization and appropriation of funds for the Pacific Southwest Plan in less than two years, questions any need for "immediate acceptance and approval" of the regional plan by the State of California.

As "fatal defects" in the Plan, the resolution lists 14 major points, among them the absence of including surplus water from the Pacific Northwest in the Udall plan, especially since doubts exist as to whether Northern California does possess an actual surplus of water, over and above the state's own needs.

Possibility of a desalinization cost "breakthrough", which could make long-distance transportation of water obsolete, is emphasized,

and the municipal and industrial water by power revenues, as proposed in the Udall plan, also is raised.

Regional problems, including the question of protection for northern California counties of origin, and the fate of Southern California's Metropolitan Water District facilities, are cited.

Agriculture's problems in the Central valley's "richest agricultural area in the nation" — also receive attention. The resolution favors priority in federal development of water for agricultural, rather than municipal and industrial purposes, and adds that "a re-examination of the state's own agricultural water pricing policies appear to be in order."

J. POST WILLIAMS VISITING RUSSIA

VISALIA, Nov. 14 — J. Post Williams, Tulare county superintendent of schools, is among 92 American educators and school board members who are making a 21-day field study of educational reform in Russia and the Scandinavian countries.

SOME OF the 29 cotton pickers are shown above that were in the field Sunday during annual cotton picking bee, sponsored by the Poplar chamber of commerce to raise funds for

Forensic Honors Earned By Students At High School

PORTERVILLE, Nov. 14 — Sixteen Porterville high school students were recently initiated as charter members of the PUHS chapter of the National Forensic league.

The initiation ceremonies, conducted at the home of speech teacher, Mrs. Shirley Hickman, paid special tribute to Pam Clark and Karen Roper who have earned 75 points in forensic competition plus the Degree of Honor.

Students with the Degree of Merit after earning 25 points are Bob Baty, Jayne Choate, Cathy Cornell, Ellen Cemo, Marion Clement, John Darcy, Nancy Garcia, Roland Hill, Jim Jones, Janet Mills, Monty Mitchell, Chris Owen, Kathleen Souza, and Linda Tabor.

Eddie Hunt Named Class President

PORTERVILLE, Nov. 14 — Eddie Hunt, a pre-teaching major, has been elected president of the sophomore class at Porterville college. Other officers are: David Hath, vice president; Mary Hutchinson, secretary; Cheryl Hill, treasurer; and Donna Speck, Inter-Club Council representative.

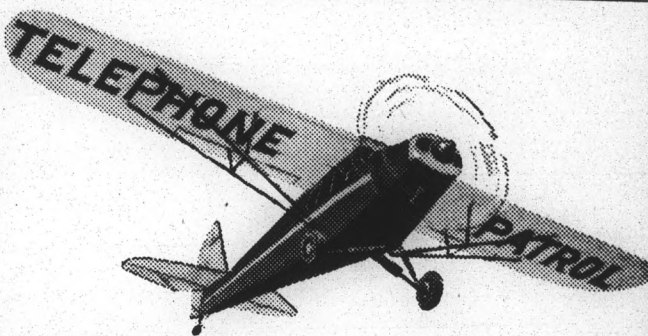

the Tule River Youth Center project. With machines donated, some 120 acres harvested will return nearly \$3,000 to the Poplar chamber. Donating two-row cotton pickers were: Roy Langston, Roy Brinkley, Hack Hutchinson, Charley Minoletti, Melvin Santry, and Manual Martin; putting single-row pickers in the field were: Andrew Vossler & Sons, 3; Howard Tharp, D. Ryan, and Haskell Oliver, two each; and Clarence Valine, Don Koontz, Dick Holgate, Don

Farquaharson, Jim Bays, H.L. Tharp, Harold Wilcox, Dick Woodard, Allen Jones, Jolin Taggard, Richard Merritt, Overholt Brothers, Andrew Vossler, Ray Hutchinson and John Kotchevar. Providing other equipment or services were Farmers Tractor and Equipment company, Hastings Equipment company, and Jim Quinn company of Porterville; G & W Chevrolet, of Porterville, and Ray George and Bert Gray, of Poplar. (Farm Tribune photo)

WHAT'S DOING

R. C. Board, your Telephone Manager in Porterville

Maintaining phone lines is a never ending job! To keep long distance phone lines ready for your calls to or from Porterville, men in Telephone Patrol planes fly along hundreds of miles of phone cable nearly every day. They're on the lookout for construction work or other hazards that might damage underground or overhead lines. They warn anyone on the ground working near cables by dropping notes or calling to them over the plane's loudspeaker system.

You, too, can help protect your service (and your neighbors') by watching out for buried cable if you have occasion to use digging equipment on your property. If you're having a contractor handle the job, it's a good idea to remind him, too.

If you have any questions about the location of a buried cable in the Porterville area, just give us a call.

While it didn't happen here, a mystery of phones ringing without callers recently was unraveled. Seems that a bull loved to scratch his back on the guy wire of a telephone pole in his pasture. Each time, the friction caused all the telephones on the rural line to ring.

Everyone was happy when telephone men moved the pole to the other side of the fence. Everyone, that is, except the bull.

Planning a program for your group or club? We at your telephone business office will be glad to supply free films and arrange interesting lectures and demonstrations.

$$24 \times 2 \times 3 \times 365 \div 2 =$$

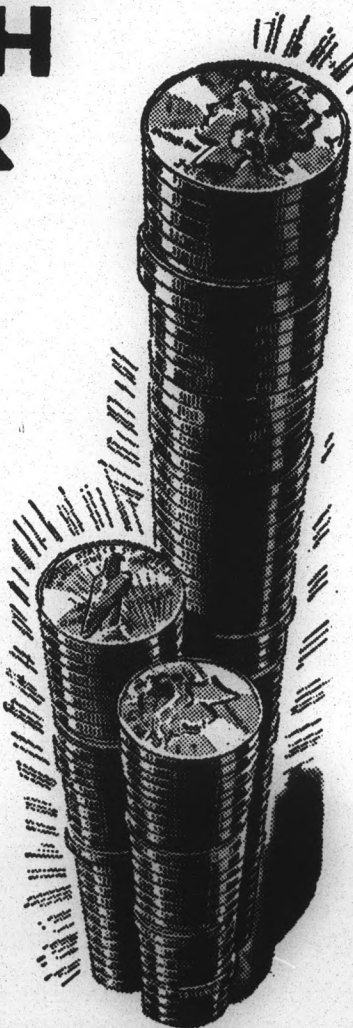

Here's a problem that calls for some backyard arithmetic. Let's say Mrs. Smith's telephone is in her living room—24 feet from the kitchen. She gets at least three phone calls a day when she's in the kitchen. This means that she walks 48 feet, back and forth, to answer the phone each time. That's 144 feet of walking a day, 52,560 feet a year. Now if Mrs. Smith's average step is 24 inches in length, how many extra steps does she make a year?

Any way you figure it, the best solution is a kitchen wallphone. It's one addition that lets you subtract steps.

"Electronics Is Our Business"

"Who We Serve Is A Measure Of How We Serve"

Time Out

By Davis Harp

HARP RUINS MOVIE CAREER OF "TITANIC", DEER OF THE TULE

He would have been a great deer if he had lived. He would have been a leader of the Tule river herd and Walt Disney might have even made a picture about him. He could have called it "Titanic, Deer of the Tule".

He was a well-made buck, (if we were a deer, we would have liked to have looked like him) his gray-brown hide was luxuriant in the fall season and he was filled

out with good living. A true stag.

He stood that early Saturday morning sniffing the breeze in the bottom of a small canyon. He didn't have a chance as we were using the benefit of the thousands of hunting years of our Cherokee ancestors.

We heaved ourself over the horizon, making only a little more noise than a deisel locomotive (we forgot to wear our moccasins that morning), and spotted the buck there below us. We whipped out our note book and pencil and began figuring the distance, wind velocity, light density, and rifle barrel corkscrew effect. Fifteen minutes later, after going through many complicated and mysterious

formulas we found that in order to hit the deer we would have to aim at a rock located 300 yards above and 200 yards to the right of deer. He was 75 yards away. We assumed a sitting position and squeezed the trigger. The Tule river herd was deprived of a leader and Walt Disney of a new star.

After completing the customary Cherokee hunting dance around the fallen buck we realized that we were a long way from the car and a good deal of the trip was up hill. We could feel our old back injury begin to react. By the time our father-in-law, who was hunting in the next canyon, reached us we could hardly stand erect. To carry or drag a deer would be risking permanent injury or disability, and an Indian with a bad back is no good to anyone. The father-in-law, realizing the problem, consented to getting the deer out and we smiled through pain-

clined teeth and agreed to carry his rifle.

When we finally got the deer to the locker the man put him on the scale. The needle rolled all the way over to 47 pounds. The man wanted to know where the rest of the deer was, and why we had only brought half of him in.

We offered the deer horns to the wife. We figured they would be great for hanging spools of thread on or rings and other small jewelry items.

Our grandfather, Hunting Eagle, would have been proud of us.

MISS AGNES STROM, above, of Visalia, has been named county chairman of the 1964 Easter Seal campaign; she will lead volunteers in conducting the annual drive for funds by the Tulare County Society for Crippled Children to continue and expand the society's services to physically handicapped children and adults living in the county.

CHAPEL CHIMES

By Rev. N. J. Thompson

In a public school classroom discussion the teacher was startled when little Tommy asked, "Who is God?"

The teacher began, "God is the name given to . . ."

"Stop!" cried another student. "If you say anything about God, I'll tell my dad on you. My dad is an atheist, and if God is mentioned in school, he'll make trouble."

"I'm sorry, Tommy," said the teacher. "It's unlawful for me to talk about God."

Little Tommy never went to church. Neither did his parents. When Tommy asked his mother about God, she said, "Can't you see I'm busy cooking supper? Now run along. I'll call you when supper's ready."

Ten years went by. Tommy stood one day in the prisoner's dock charged with murder. The judge called on him to take an oath. Tommy asked, "What is an oath?" And the learned judge explained that an oath was calling on God to witness to the truth of what you say.

"Who is God?" Tommy asked. The judge scowled, thinking the prisoner must be joking. But the prisoner's face looked sincerely puzzled. The judge explained, "God is the Creator of heaven and earth. He is the source of all life, all power, all wisdom, all knowledge, all love. All our laws are based on the Ten Commandments God gave Moses thousands of years ago. And we are all accountable to God for obedience to His Commandments."

"This comes too late in my life," Tommy said sadly. "Somebody should have told me — years ago. But my parents were always too busy to teach me about God. And my schoolteacher said it was unlawful for him to talk about God."

"I understand," said the judge. "If you want to know more about God, I'd suggest you ask your chaplain in jail."

Long wait for water ended by quick loan

One of our farmer customers happened to mention that in a couple of years he would finally have his own irrigation system he had been waiting for. "By then," he said, "my savings account will be big enough to manage the deal."

His Crocker-Citizens farm banker frowned. "Bill," he said, "you're wasting time and money by waiting. Why not borrow the extra money you need and put in that system now?"

"And pay hundreds of dollars in interest? Not on your life!"

His farm banker took out a pencil. "Well," he said, "let's figure out which way is smarter."

As the estimated figures were set down, they began to tell an absorbing story. By borrowing to install the irrigation system at once, the

farmer would be paying interest, of course. And he would also be giving up the interest his savings account was earning for him.

However, this was offset many times over by the estimated increase in crop income which the system would bring. Figured conservatively, the farmer would be several thousands of dollars ahead at the end of a two-year period.

He decided to act. Only a couple of days later, work was begun on the installation.

That was three years ago. As it turned out, the Crocker-Citizens farm banker's estimate was conservative indeed. Not only has the loan been completely repaid—but the farmer's savings account is now bigger than it ever was.

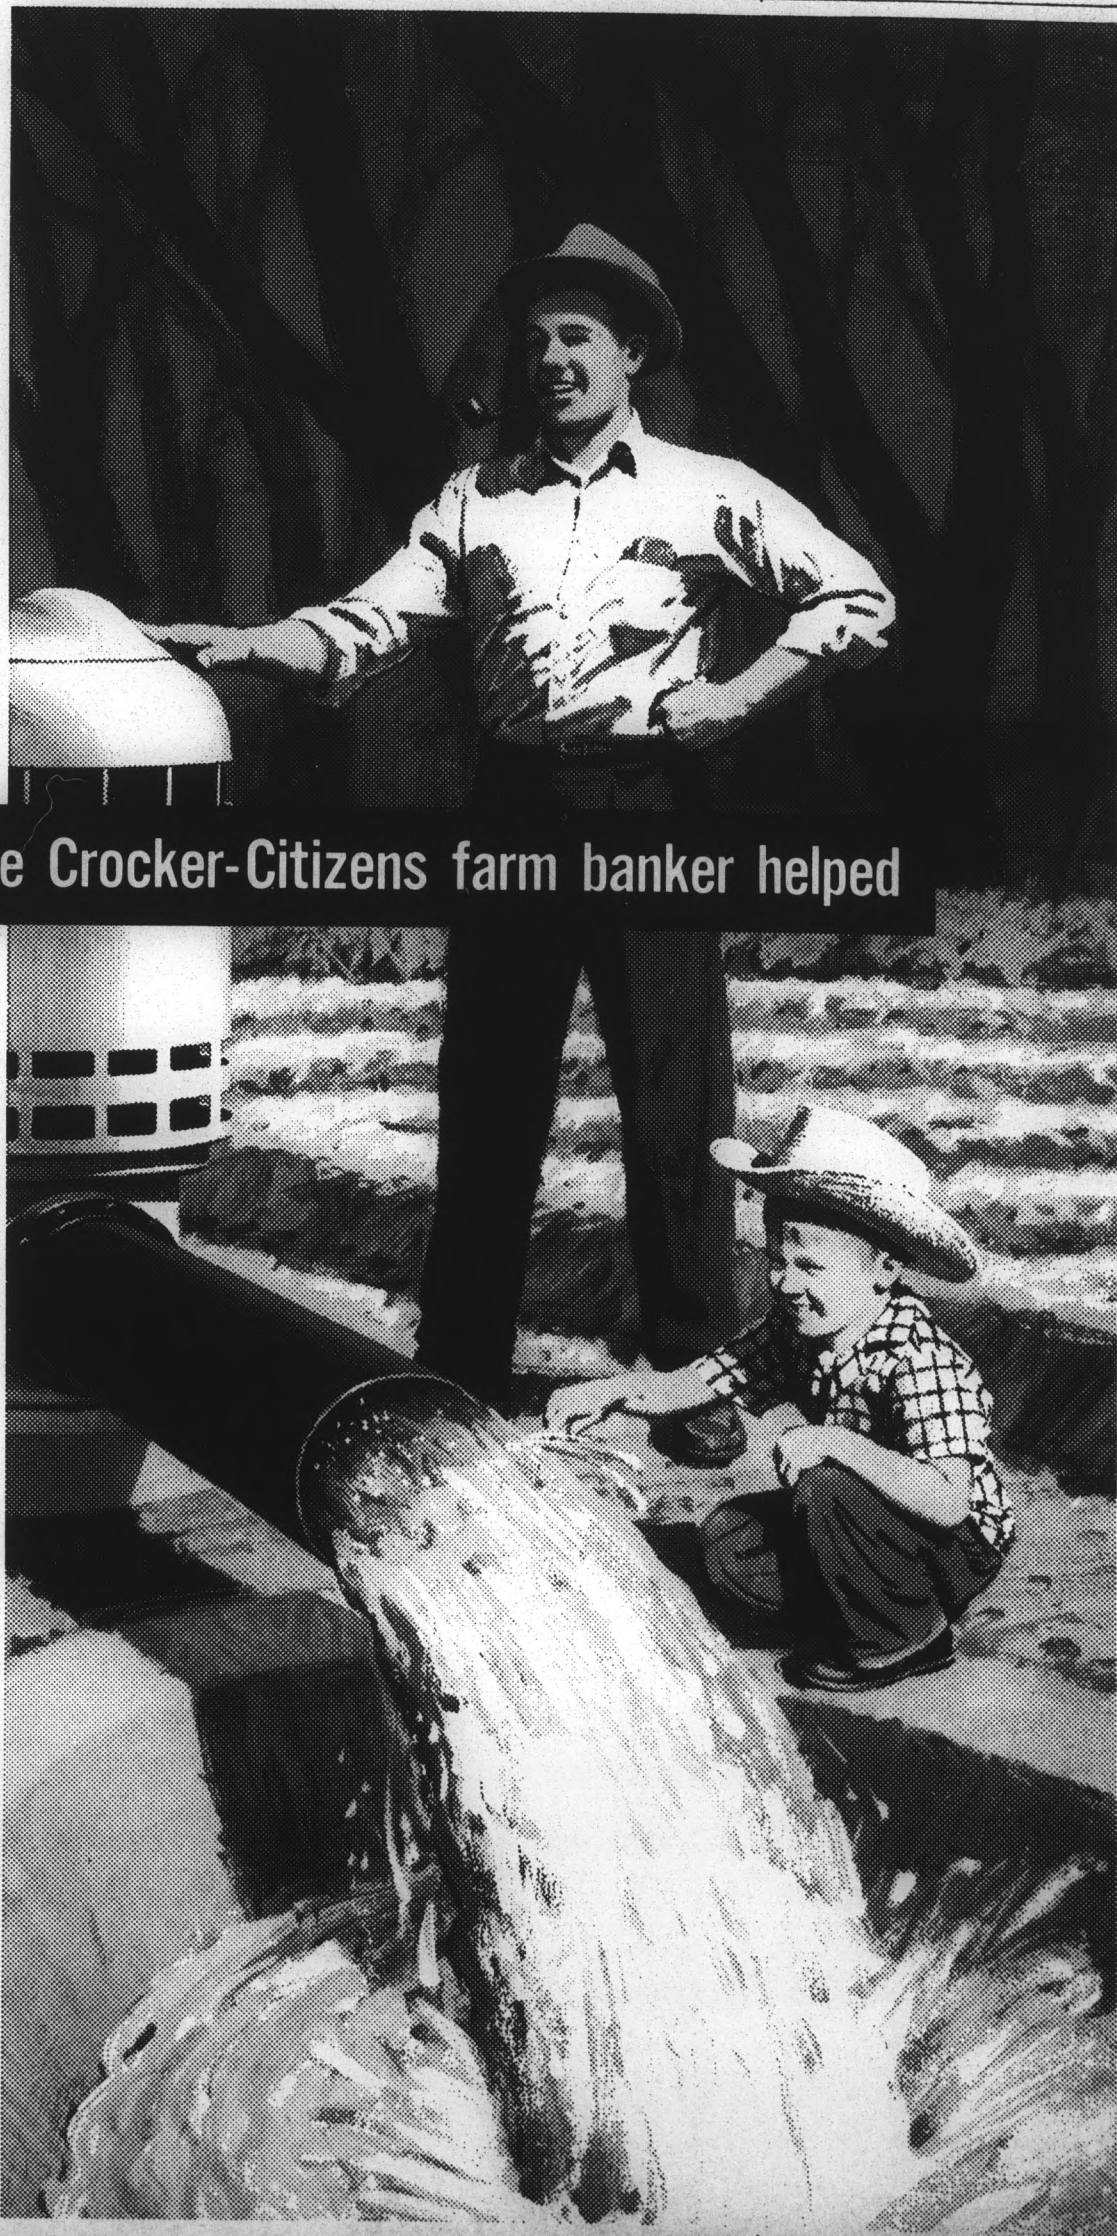

Wayne L. Phelps, one of Crocker-Citizens' farm bankers, was graduated in '36 from the University of California College of Agriculture. He has worked in the agricultural field ever since. He is in charge of farm loans at C-C's Stockton office.

WHAT STARTED out to be a series of character studies seems to have ended up as a study of characters - but they're all Bushfaces, sturdy and strong, assembled last Saturday night at the Eagle Lodge hall for annual meeting of the Mystic Knights of the

Supreme Order of Bushfaces. From left to right, top to bottom: Lyle Attebury, E. M. Carlsson, George Beckett, Walt Pratt, Carroll Simmons, Bill Horst and Jack Boesch; Spike Wilson, Bob Bray, Clarence Pace, Alan Hammond, Bill Burke, John Daybell, Hal Brad-

en, and Alvin Meier; Al Encinas, Domer Power, Bob Moyle, Clyde Hammond, Marty Martin, Marvin Green, and Earl Barkwill; Louie Futrell, Ivan Williamson, Bill Hanawalt, Bill Elsworth, Cowboy Pierce, Elmer Broad, and Lloyd Zimmerman. The Bushfaces, or-

ganized during the Porterville Centennial, reactivated last summer to grow beards and to raise money for the Porterville museum. Final beard judging was November 11 - the beards are now off and gone until another day.

Student Officers Will Attend College Conference

PORTERVILLE, Nov. 14—Five student body officers from Porterville college, accompanied by Arthur Van Horn, the dean of Student activities, will attend the 36th annual semi-annual conference of the California Junior Col-

lege Student Government association to be held November 21-23 at Asilomar.

Students of Hartnell, Cabrillo, Monterey Peninsula and Gavilan colleges will be hosts for the conference, which will discuss problems in student government and activities as identified at regional conferences.

Porterville College representatives will be Douglas Van Horn,

student body president, who will attend a workshop for presidents; Calvin Todd, vice president, campus activities workshop; Miriam Bell, treasurer, campus attitudes; Carolyn Ambrosini, recording secretary, and Gale Powell, corresponding secretary, campus communications.

Arthur Van Horn will serve as

a resource chairman for a workshop on campus organizations.

Each of California's 70 junior colleges is allowed five delegates to the conference, and the participating schools are divided into study sections and workshops on the basis of their enrollment. Art Renney of Hartnell College is president of the state association.

LETTUCE AND MELONS TO BE MACHINE PICKED

LOS ANGELES, Nov. 14 — Experimental models of machines that eventually may ease the shortage of workers to harvest California's \$75 million head lettuce and \$28 million cantaloupe crops were star attractions at last week's annual convention of the Western Growers Association.

Complete with electronic "feelers" and memory switches were two prototype lettuce harvesters, one being developed by the Uni-

versity of California and the other by the University of Arizona. Also on display was a prototype cantaloupe harvester being developed.

"These machines, while showing much promise, are still in the experimental stage and it could take from three to five years before they harvest any substantial acreages," according to Ralph Parks, UC engineer in charge of the exhibit.

Neither machine is in commercial production as yet, although several manufacturers are showing interest, Parks told the Council of California Growers.

Parks pointed out that "mechanical harvesting machines really don't replace workers in the long run. They free men from back-breaking work, hot and dirty work that most Americans shun. Actually, they create employment in steel making, rubber manufacturing, tool plants, and in numerous service industries."

A delicate subject

■ Pharmacies deal in some products which can only be described as intimate. Some people are often self-conscious about mentioning such needs. They shouldn't be. LEGAL NOTICE

ORDINANCE NO. 932

AN ORDINANCE AMENDING SECTIONS 7003, 7006.5, 7006.7, 7006.8, 7006.23, 7008, 7074, 7079, 7080, 7081, 7085.5, 7101, 7104 AND 7105 OF THE ORDINANCE CODE OF TULARE COUNTY, REPEALING SECTION 7006.9 AND ARTICLE 6 OF CHAPTER 1 OF PART VII OF SAID CODE, AND ADDING A NEW ARTICLE 6, CONSISTING OF SECTIONS 7090 THROUGH 7097, TO CHAPTER 1 OF PART VII OF SAID ORDINANCE CODE, PERTAINING TO SUBDIVISIONS OF LAND AND OTHER DIVISIONS OF LAND.

THE BOARD OF SUPERVISORS OF THE COUNTY OF TULARE DO ORDAIN AS FOLLOWS:

Section 1. Section 7003 of the Ordinance Code of Tulare County is hereby amended to read as follows:

SECTION 7003. ZONING ORDINANCES: A subdivision map shall conform to all zoning ordinances set forth in this Ordinance Code, and Ordinance No. 352, with respect to uses of land, lot sizes and dimensions, space for off-street parking and off-street loading areas and all other applicable regulations.

Section 2. Section 7006.5 of the Ordinance Code of Tulare County is hereby amended to read as follows:

SECTION 7006.5. "DIVISION OF LAND": "Division of land" means any real property or portion thereof shown on the last preceding tax roll as a unit or as contiguous units which is divided for the purpose of sale, whether immediate or future, into four (4) lots or less, if any one (1) lot resulting therefrom contains four and one-half (4½) acres or less; provided, however, that a division of land does not include any of the following:

- (a) Any real property which constitutes a subdivision under section 7006.23 of this Article.
- (b) Any conveyance made or required by court decree and intestate or testamentary dispositions of land.
- (c) Any conveyance by or to the State of California, any city or county, or any other political subdivision of the State of California.
- (d) Any conveyance of easements, or mineral, oil or gas rights or leasing of apartments, offices, stores or similar space within an apartment building, industrial building, commercial building, or trailer park.

Section 3. Section 7006.7 of the Ordinance Code is hereby amended to read as follows:

SECTION 7006.7. "INSTRUMENT OF CREDIT": "Instrument of credit" means an instrument of credit from a financial institution which is subject to regulation by the State or federal government pledging that the funds necessary to meet the performance are on deposit and guaranteed for payment and agreeing that the funds designated by the instrument shall become trust funds for the purposes set forth in the instrument.

Section 4. Section 7006.8 of the Ordinance Code of Tulare County is hereby amended to read as follows:

SECTION 7006.8. "LOT": "Lot" means a parcel of subdivided land under one ownership used or susceptible of being used in accordance with the regulations of this Chapter and in accordance with the regulations of the applicable zoning ordinances of the County.

Section 5. Section 7006.9 of the Ordinance Code of Tulare County is hereby repealed.

Section 6. Section 7006.23 of the Ordinance Code of Tulare County is hereby amended to read as follows:

SECTION 7006.23. "SUBDIVISION":

- (a) "Subdivision" means any real property, improved or unimproved, or portion thereof, shown on the latest adopted County tax roll as a unit or as contiguous units, which is divided for the purpose of sale or lease, whether immediate or future, by any subdivider into five (5) or more parcels; provided, however, that this Chapter shall not apply to the leasing of apartments, offices, stores, or similar space within an apartment building, industrial building, commercial building, or trailer park, nor shall this Chapter apply to mineral, oil or gas leases.
- (b) The term "Subdivision" does not include either of the following:

1. Any parcel or parcels of land divided into lots or parcels, each of a net area of twenty (20) acres or more, to be sold or leased for commercial agricultural purposes each of which abuts upon an improved public street or highway and the lot design meets the approval of the Board of Supervisors.
2. Any parcel or parcels of land abutting on a public street or highway which comprises part of a tract of land zoned as M-2, Heavy Manufacturing Zone, a tentative map of which has been submitted to and approved by the Board of Supervisors as to street alignments and widths, sewage and drainage provisions.
3. In either case provided in this subsection, a tentative map shall be submitted to the Board of Supervisors in the same manner as provided in Article 4 of this Chapter for subdivisions and approved by the Board of Supervisors as to all requirements of this section and thereafter a record of survey map in accordance with the approved tentative map shall be filed pursuant to the

LEGAL NOTICE

provisions of Chapter 15 of Division 3 of the Business and Professions Code of the State of California, and thereupon conveyances may be made of lots or parcels shown on such map by lot or block number, initial or such other designation as may be shown on such map.

- (c) The term "Subdivision" includes a condominium project, as defined in section 1350 of the Civil Code of the State of California, containing five or more condominiums, and a community apartment project, as defined in section 11004 of the Business and Professions Code of the State of California, containing five or more parcels; but maps of such projects need not show the buildings or the manner in which the buildings or the airspace above the property shown on the map are to be divided, nor shall the Board of Supervisors have the right to refuse approval of a tentative or final map of such a project on account of design or location of buildings on the property shown on the map nor violative of County ordinances or on account of the manner in which airspace is to be divided in conveying the condominium. Fees and lot design requirements shall be computed and imposed with respect to such maps on the basis of parcels or lots of the surface of the land shown thereon as included in the project. The design and location of buildings in such a project shall be subject to all applicable provisions of this Ordinance Code and all other applicable ordinances of the County.
- (d) Nothing contained in this Chapter shall apply to land dedicated for cemetery purposes under the Health and Safety Code of the State of California.

Section 7. Section 7038 of the Ordinance Code of Tulare County is hereby amended to read as follows:

SECTION 7038. STREET SIGNS: The subdivider shall provide one (1) street sign at each intersection. The type of street sign and the locations shall be approved by the County Surveyor. If the subdivider and the County Surveyor mutually agree that the County Surveyor shall construct the required street signs for the subdivider, the County Surveyor shall construct the required signs and the subdivider shall reimburse the County Surveyor for the full cost of constructing such signs.

Section 8. Section 7074 of the Ordinance Code of Tulare County is hereby amended to read as follows:

SECTION 7074. MONUMENTS:

- (a) All monuments shall be marked or tagged in accordance with the provisions of section 8772 of the Business and Professions Code of the State of California.
- (b) The final map shall show clearly all stakes, monuments or other evidence found on the ground which were used as ties to determine the boundaries of the tract. The corners of adjoining subdivisions or portions thereof shall be identified and ties shown.
- (c) In making the survey for the subdivision, the surveyor shall set sufficient, permanent monuments to conform with the standards described in section 8771 of the Business and Professions Code of the State of California so that the survey or any part thereof may be readily retraced. Such monuments shall generally be placed at the angle points on the exterior boundary lines of the tract, at the intersections of center lines of streets and at the beginnings and ends of curves on the center lines of streets. Monuments may be placed on offset lines. All monuments shall be set not less than eight (8) inches below finished grade and shall be of concrete six (6) inches in diameter and twelve (12) inches in length, or of capped iron pipe two (2) inches in diameter, and twenty-four (24) inches in length. Lot stakes shall be set flush to finished grade and shall be of redwood, two (2) inches by two (2) inches by (12) inches, or of iron pipe or rod, one-half (½) inch in diameter and eighteen (18) inches in length. The character, type and positions of all monuments shall be noted on the final map. The final map shall be accompanied by a statement by the subdivider indicating when lot stakes will be set and the type of stakes to be used.
- (d) The Board of Supervisors may require that the exterior boundary of the land being subdivided be adequately monumented or referenced before the map is recorded. Interior monuments need not be set at the time the final map is recorded if the engineer or surveyor certifies on the map that the monuments will be set on or before a specified later date, and if the subdivider furnishes to the Board of Supervisors a bond or cash deposit guaranteeing the payment of the cost of setting the monuments in accordance with the provisions of section 11592 of the Business and Professions Code

LEGAL NOTICE

of the State of California. The bond or cash deposit shall be held by the Board of Supervisors subject to all of the provisions of said section 11592. Within five (5) days after the setting of final monuments has been completed by the engineer or surveyor, he shall give written notice to the subdivider and the County Surveyor that the final monuments have been set.

Section 9. Section 7079 of the Ordinance Code of Tulare County is hereby amended to read as follows:

SECTION 7079. IMPROVEMENTS: EXTENT: The subdivider shall improve all lands dedicated for streets, alleys, pedestrianways, drainage channels, easements and other rights of way, subject to the following exceptions:

- (a) If the subdivision is served by a frontage road parallel to a major street, highway or freeway and the required right of way dedication for the major street, highway or freeway has been made by the subdivider, the subdivider shall be responsible for only those improvements required for the frontage road, both with respect to the standards prescribed in Table 1 and those required under subsection (a) of section 7080, and the subdivider shall not be required to provide improvements within the right of way of the contiguous and parallel major street, highway or freeway.
- (b) If the subdivision backs onto a major street, highway or freeway or onto a secondary street and the required right of way dedication for the major street, highway, freeway or secondary street has been made by the subdivider and the subdivider has dedicated the right of access from the major street, highway or freeway or secondary street to the subdivision, the subdivider shall not be required to construct the improvements prescribed in Table 1 and those required in subsection (a) of section 7080 within the right of way line of the major street, highway or freeway or secondary street. In such cases the subdivider may landscape the planting strip of the adjacent major street, highway, freeway or secondary street with plant materials adequate to screen the lots of the subdivision from the major street, highway, freeway or secondary street.

Section 10. Section 7080 of the Ordinance Code of Tulare County is hereby amended to read as follows:

SECTION 7080. SAME: REQUIREMENTS:

- (a) All improvements shall conform to the applicable standards of design and materials which are set forth in the pamphlet entitled "Standards Adopted on the 5th day of November, 1963, by the Tulare County Board of Supervisors for Construction of Improvements in Subdivisions" and also in the book entitled "Standard Specifications, State of California, Department of Public Works, Division of Highways, January, 1960 Edition." Three copies of the aforementioned pamphlet and book have heretofore been filed for use and examination by the public in the office of the Clerk of the Board of Supervisors in accordance with section 11611 of the Business and Professions Code of the State of California, and said pamphlet and book are hereby adopted by reference as the standards for Tulare County.
- (b) Improvements shall be constructed in accordance with plans approved by the County Surveyor. Notice shall be given by the subdivider to the County Surveyor prior to the commencement of construction of improvements.
- (c) Improvements shall be installed to grades prescribed by the County Surveyor.
- (d) The County Surveyor shall have the right to enter upon the sites of improvements for the purpose of inspecting them and the County Surveyor shall be furnished with samples of materials as may be required for making tests to determine the acceptability of such materials.

Section 11. Section 7081 of the Ordinance Code of Tulare County is hereby amended to read as follows:

SECTION 7081. SAME: AGREEMENT. SECURITY AND REPAIRS:

- (a) If the improvements are not satisfactorily completed theretofore, at the time the final map is approved the subdivider shall enter into an agreement with the County whereby, in consideration of the acceptance by the Board of Supervisors of the streets, alleys, pedestrianways, drainage channels, and other easements and rights of way offered for dedication, the subdivider agrees to complete all of the improvements required in the subdivision within the time specified in the agreement. Such agreement shall be secured by faithful performance and labor and material bonds issued by authorized corporate sureties, or

LEGAL NOTICE

by the deposit of money, negotiable bonds or instruments of credit as provided in sections 11612 and 11613 of the Business and Professions Code of the State of California.

- (b) Said agreement shall also provide that the subdivider shall repair any damage to a public street or any other public property or improvements which results from or is incidental to the construction of improvements by the subdivider in the subdivision, or that, in lieu of making such repairs, the subdivider shall pay to the County the full cost thereof.

Section 12. Section 7085.5 of the Ordinance Code of Tulare County is hereby amended to read as follows:

SECTION 7085.5. ACTION ON OFFERS TO DEDICATE OR CONVEY PROPERTY TO COUNTY: Concurrently with the approval of the final map, the Board of Supervisors shall accept or reject offers of dedication and also accept the lots which are offered for conveyance to the County pursuant to section 7020 of this Chapter.

Section 13. Article 6 of Chapter 1 of Part VII of the Ordinance Code of Tulare County, consisting of sections 7090 through 7098, inclusive, is hereby repealed.

Section 14. A new Article 6, consisting of sections 7090 through 7097, inclusive, is hereby added to Chapter 1 of Part VII of the Ordinance Code of Tulare County to read as follows:

ARTICLE 6. REVERSION TO ACREAGE MAP

SECTION 7090. PROCEDURE: Except as otherwise provided in this Article, a final map of a reversion to acreage shall be prepared, filed and processed in accordance with the provisions of Articles 1, 2, 5, 8 and 9 of this Chapter. The requirements of Article 4 of this Chapter concerning tentative maps shall also be complied with unless waived in writing by the Director of Planning.

SECTION 7091. TITLE AND LEGAL DESCRIPTION: A final map filed for the purpose of reverting subdivided land to acreage shall be conspicuously designated with the title "The Purpose of This Map is a Reversion to Acreage." A legal description of the land being reverted to acreage shall appear on the final map.

SECTION 7092. STREETS AND EASEMENTS: The final map shall be accompanied by evidence of title and nonuse of streets and easements in the subdivision. Any streets and easements to be left in effect after the reversion shall be adequately delineated on the final map.

SECTION 7093. DEDICATIONS NOT REQUIRED: No dedications for streets, alleys, pedestrianways, drainage channels, easements or other public purposes shall be required as a condition of approval of a reversion to acreage map.

SECTION 7094. CHECKING BY COUNTY SURVEYOR: One (1) complete set of original tracings and one (1) complete set of black and white prints of the final map of the proposed reversion to acreage shall be submitted to the County Surveyor for checking.

SECTION 7095. CERTIFICATION BY COUNTY SURVEYOR: If the final map of the reversion to acreage is found to be correct and the matters shown thereon are sufficient and all applicable provisions of the Subdivision Map Act and this Chapter have been complied with, the County Surveyor shall certify his approval on the map and shall file it with the Board of Supervisors for approval.

SECTION 7096. PUBLIC HEARING BY BOARD OF SUPERVISORS: UPON receipt of the final map from the County Surveyor, the Board of Supervisors shall call a public hearing on the proposed reversion to acreage. Notice of such hearing shall be published in a newspaper of general circulation within the area affected at least once in each of two (2) weeks immediately preceding the hearing.

SECTION 7097. RECORDING FINAL MAP: EFFECT: After holding the public hearing, if the Board of Supervisors approves the reversion to acreage, the final map shall be delivered by the Clerk of the Board of Supervisors to the County Recorder who shall record the final map. The filing of the final map with the County Recorder shall constitute legal reversion to acreage of the land affected thereby and shall also constitute abandonment of all streets and easements not shown on the map.

Section 15. Section 7101 of the Ordinance Code of Tulare County is hereby amended to read as follows:

SECTION 7101. DEFINITIONS: The following definitions, in addition to those set forth in Article 1 of this Chapter, shall be used in interpreting this Article:

- (a) For the purpose of this Article, a "lot" is defined as a parcel of land under one ownership which is used, or susceptible of being used, in accordance with the regulations of this Chapter and in accordance with the regulations of the applicable zoning ordinances of the County.
- (b) The term "division of land" means any real property or portion thereof shown on the last preceding tax roll

LEGAL NOTICE

as a unit or as contiguous units which is divided for the purpose of sale, whether immediate or future, into four (4) lots or less, if any one (1) lot resulting therefrom contains four and one-half (4½) acres or less; provided, however, that a division of land does not include any of the following:

1. Any real property which constitutes a subdivision under section 7006.23 of this Chapter.
2. Any conveyance made or required by court decree and intestate or testamentary dispositions of land.
3. Any conveyance by or to the State of California, any city or county, or any political subdivision of the State of California.
4. Any conveyance of easements, or mineral, oil or gas rights or leasing of apartments, offices, stores or similar space within an apartment building, industrial building, commercial building, or trailer park.

(c) The term "original parcel" means a contiguous area of land at the time of division, in one or a common ownership, any portion or all of which is proposed to be divided under this Article.

Section 16. Section 7104 of the Ordinance Code of Tulare County is hereby amended to read as follows:

SECTION 7104. INFORMATION ON PLAT: The plat shall contain the following information in legible form:

- (a) The boundary lines of the original parcel or parcels, with dimensions, based on existing survey data.
- (b) The proposed division lines with dimensions and the area of each lot to be created by such division of land.
- (c) All existing surface and underground structures and improvements located on the original parcel or parcels together with the exterior dimensions of said structures and improvements, the distance between structures and improvements, the number of stories or the height of each structure and improvement, and the distance from the structures and improvements to the boundary lines of the lots which are to be created by the proposed division of land.
- (d) The names, locations and widths of all abutting streets.
- (e) The proposed location, purpose and width of all proposed streets and easements.
- (f) The proposed use of the property to be divided.
- (g) The proposed water supply.
- (h) The proposed method of sewage disposal.
- (i) A description of the property sufficient to identify it on the County Assessor's maps.
- (j) The following certificate signed by the legal owner or his authorized agent:

I hereby apply for approval of the division of real property shown on this plat and certify that I am the legal owner (or the authorized agent of the legal owner) of said property and that the information shown hereon is true and correct to the best of my knowledge and belief.

Signed: _____

Address: _____

If the above certificate is signed by an agent of the legal owner, such agent must submit written authorization from the owner with the plat.

Section 17. Section 7105 of the Ordinance Code of Tulare County is hereby amended to read as follows:

SECTION 7105. REVIEW BY LOT SPLIT COMMITTEE: The proposed division of land shall be reviewed and approved, conditionally approved or disapproved by the Lot Split Committee. The Lot Split committee shall be a committee composed of the Director of Planning, the County Road Commissioner and the County Health Officer, or their duly authorized representatives.

Section 18. The General Provisions of the Ordinance Code of Tulare County, consisting of section 101 through section 114, inclusive, are hereby adopted by reference and made applicable to the provisions of this ordinance.

Section 19. Any offer to sell, contract to sell, sale, or deed of conveyance of a subdivision or any part thereof, before a final map thereof in full compliance with the provisions of Chapter 1 of Part VII of the Ordinance Code of Tulare County has been duly recorded or filed in the office of the County Recorder shall be a misdemeanor, and any person, upon conviction thereof, shall be punishable by a fine of not less than Twenty-five Dollars (\$25.00) and not more than Five Hundred Dollars (\$500.00), or by imprisonment in the county jail for a period of not more than six (6) months, or by both such fine and imprisonment. Nothing in this section shall be deemed to bar any legal, equitable, or summary remedy to which the County or any other political subdivision, or person may otherwise be entitled and the County or any other political subdivision, or person may file a suit in the Superior Court of the County to restrain or enjoin any attempted or proposed subdivision or sale in violation of said Chapter 1.

Section 20. Any offer to sell, contract to sell, sale, or conveyance of

(Continued On Page 10)

LEGAL NOTICE

ORDINANCE NO. 932
(Continued From Page 9)

any part of a division of land, as defined in Article 7 of Chapter 1 of Part VII of the Ordinance Code of Tulare County, before receiving the approval of said division of land required under said Article 7, shall be a misdemeanor, and any person, upon conviction thereof, shall be punishable by a fine of not less than Twenty-five Dollars (\$25.00) and not more than Five Hundred (\$500.00), or by imprisonment in the county jail for a period of not more than six (6) months, or by both such fine and imprisonment. Nothing in this section shall be deemed to bar any legal, equitable, or summary remedy to which the County or any other political subdivision or person may otherwise be entitled and the County or any other political subdivision, or person may file a suit in the Superior Court of the County to restrain or enjoin any attempted or proposed division of land or sale in violation of said Chapter 1.

Section 21. This ordinance shall take effect on December 5, 1963, and prior to the expiration of fifteen (15) days from the passage hereof, shall be published once in the Farm Tribune, a newspaper printed and published in the County of Tulare, State of California, together with the names of the members of the Board of Supervisors voting for and against the same.

THE FOREGOING ORDINANCE was passed and adopted by the Board of Supervisors of the County of Tulare, State of California, on the 5th day of November, 1963, at a regular meeting of said Board, duly and regularly convened on said day, by the following vote:

AYES:

Surplus at June 30, 1962	5,714.94
Surplus at June 30, 1963 — Deficit	\$ (1,768.45)

Our examination was made in accordance with generally accepted auditing standards and accordingly included such tests of the accounting records and such other auditing procedures as we deemed necessary in the circumstances except that we were not present when the inventory was taken. However, we satisfied ourselves as to physical quantities at a later date.

In our opinion, the accompanying balance sheet and related statements of operations present fairly the financial position of the Sierra View Local Hospital District at June 30, 1963, and the results of its operations for the year then ended in conformity with generally accepted governmental accounting procedures applied on a basis consistent with the prior year.

posed projects and bond issues.

Basic work in the proposed disposal system is construction of a sewage disposal plant and outfall lines.

Three measures will be on the ballot: A. The issuing of general obligation bonds for water system improvement in the amount of \$30,000; B. The issuing of general obligation bonds for construction of a sewage disposal system in the amount of \$127,000; and C. The issuing of revenue bonds for sewage system work in the amount of \$53,000.

Actual calling of the bond election comes after several years of study and discussion concerning necessary improvement of sanitary facilities in the Springville Pub-

Appaloosa Horse Sale November 23

(Continued From Page 1)

Lynch, of "The Horse Lovers Magazine", and Larry Patton, of "Western Livestock Journal".

Included in the pedigrees of the "mountain raised horses" of the Lally-Pop ranch are some of the most powerful foundation blood lines in the nation; high quality Appaloosa breeding stock, with emphasis on performance, will be offered.

Many of the mares have produced high-colored foals from the powerful, color-producing Lally-Pop stallions, and will sell carrying the services of these same stallions.

Mr. and Mrs. Dilts established their ranch several years ago in the Milo area and are rated among the top breeders of Appaloosa horses in the nation.

DUTCH CORNER HISTORICAL MEET SUNDAY

DUCOR, Nov. 14 — "Sheep In Tulare County" will be the subject of a Tulare County Historical society meeting at Dutch Corners — now Ducor, next Sunday afternoon, starting at 2:30 o'clock at the Ducor Women's clubhouse. The public is invited to attend; W. J. Lubling will serve as chairman of the day.

Although sheep raising and wool production was a major agricultural industry in this area during the early days, there has been little written about it, however, it is reported that the road from the San Joaquin valley to San Luis Obispo was built primarily for the purpose of hauling wool to shipping points.

As late as the 1890s it is said there were a quarter million sheep in the southern part of Tulare county and northern Kern county,

TISSUE ANALYSIS OF COTTON PLANTS USED TO DETERMINE NITROGEN NEED

DAVIS, Nov. 14 — Tissue analysis, a chemical method of precisely measuring a plant's need for nitrogen, has been adapted to California's most important cash crop — cotton.

Several years of scientific experiments have paid off in a formula that tells growers if their cotton crop needs more nitrogen fertilizer by mid-season, or if it's likely to need more later on.

"If the need is shown by early to mid-season, the grower can apply more nitrogen during that same season. In any case, tissue analysis can give cotton growers a sound basis for adjusting their nitrogen fertilizer programs the following year," says B. A. Krantz, University of California extension

soils specialist. Krantz formerly was a member of the United States Department of Agriculture team that conducted the tissue analysis research.

Tissue analysis techniques to measure the nitrogen supply within a plant have been experimentally developed for several crops. The method is fairly widely used in citrus growing and has had some commercial success in sugar beets.

Properly used, tissue analysis not only warns the grower of potential yield loss due to lack of fertilizer but also can prevent over-fertilization. In a few areas, over-fertilized cotton may grow too thick and rank, causing boll rot, lodging, or difficulty in defoliation.

The scientists who worked out the tissue analysis technique for cotton at the U.S.D.A. Southwest Irrigation Field Station near Brawley are A. J. MacKenzie and K. R. Stockinger; W. F. Spencer, now with the USDA at Riverside; and Krantz, now with U.C. They measured the nitrate-nitrogen content of cotton plants by analyzing the leafstalks (petioles) of the youngest fully mature leaves on the main stem, during the blossom period.

The highest yield, they found, came from plants that contained as much as 16,000 parts per million of nitrogen in the early bloom and that dropped to 8,000 p.p.m. at mid-bloom and to 2,000 p.p.m.

NEW BOOKS AT PORTERVILLE CITY LIBRARY

The library has received a new group of three Canadian Films which will be available here until the end of November. The films can be checked out by organizations and groups and provide excellent and enjoyable viewing. They are 16mm, in color and with a sound track. The three currently available are TRANS-CANADA JOURNEY, SEAL HUNT, and HIGH COUNTRY SAFARI.

Books new to the Young Adult shelves include a very well written new one by Olivia Coolidge —

at late bloom. "The grower could expect little if any additional yield from higher nitrogen content, but less nitrogen might well cut yields," MacKenzie reports.

These figures are from early-fertilized plants. The early and mid-bloom readings could be considerably lower without harm, if more fertilizer were put on to keep the late-bloom reading at about 2,000 p.p.m. or above.

A critical level below which damage is almost certain to occur, the scientists decided, is from 1,000 to 2,000 p.p.m. If the petiole nitrogen content drops below that level for more than a day or two at any time, some yield loss can be expected. And the longer the period or deficit, the more loss.

The tissue analysis research was conducted in the desert cotton growing areas of Southern California. However, Krantz said, the technique, with some adaptations, would be equally valuable in the San Joaquin valley.

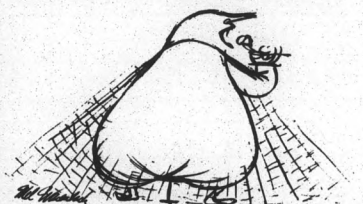

MAKERS OF THE RED REVOLUTION. Through biographical studies of seven communist leaders the author traces the history of communism from its origins to the present. A clear, factually detailed account of the ideas, personalities and events which have determined the shape of world communism today is given in this essential book. It is worthwhile for adults as well as junior high and high school age groups.

Another good non-fiction book is THE AUTOMATION AGE by Pauline Arnold. After briefly surveying the history of automation and explaining how computers work, the book concentrates on the applications and effects of automation. Its applications to industry, agriculture and the home are described with matter-of-fact conclusions and predictions about the impact of automation on the whole economy as well as the individual. This is an objective and timely book.

WINDIGO by Jane Annixter is well written and satisfying fiction for high school boys. It is the story of a boy running a family trap line in the Quebec forests after his father's death. This is an exceptional adventure story giving a knowledgeable picture of north country wildlife and ending in a gripping climax.

Mildred Lawrence has done that rare thing — written a good love story for teen age girls. The book is GIRL ON WITCHES' HILL. It is not cluttered with slush, but is realistically drawn, filled with fine detail and humorous dialogue — a remarkable book.

Your Heart Association Says DON'T BE A FUTURE CARDIAC

This chap eats too much. Shows too, doesn't it? Not only has he spoiled his figure, but Your Heart Association says over-eating can spoil his health. Carrying all that extra load can hurt his heart. Keep your weight normal.
